UM Stool

Stackable stool

This stool was inspired by and produced for UMPRUM (the Academy of Arts, Architecture & Design in Prague), and is now available for everyone. Its stackable and unique form is sure to add the right touch of interest to your space or project. The steel seat and 12mm steel frame are elegant enough for the home yet tough enough for the bar (if it can survive an art school, it'll survive anything). Check out the rest of the UM range: UM Barstool and UM Chair... #BACK2SCHOOL
